Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Belo (US Design Pat. # D518, 604) in view of Marshall (USP 373,297).

With regard to claims 1-6 as best understood, Belo discloses a wig comprising a main wig with a part (fig. 1), a cap having hair mounted thereto and an opening along the part. Belo fails to show a detachable wig portion mounted over the opening, wherein the detachable wig portion having Omega shape with a base and legs, a mesh covering between the legs and hair mounted thereto, hook and loop fasteners mounted thereto to secure the wig portion. Marshall discloses a detachable wig portion (figs. 1-3) comprising a U metal shape (A) with a base and legs extending therefrom, a fabric cover (col. 1, lines 37-39). It would have been obvious to one having an ordinary skill in the art at the time the invention was made to employ the detachable wig portion as taught by Marshall into the wig of Belo in order to form a bang. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to construct the detachable wig portion having an Omega plastic lower portion having a base and opposing legs, an upper portion having a mesh covering, since such a

modification would have involved a mere change in the shape and material of the known component. A change in shape is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955). And it would also have been an obvious matter of design choice to construct hook and loop fasteners to secure the wig portion, since such modifications are well known in the art.
